

ARJUN KUMAR

Bangalore, India | +91 XXXXX 43210 | arjun.kumar.demo@email.com | linkedin.com/in/arjunkumar-demo | github.com/arjunkumar-demo

PROFESSIONAL SUMMARY

Software Developer with 3 years of experience building Python-based backend applications, REST APIs, and automation solutions. Experienced in Python, FastAPI, SQL, Git, Docker, and cloud deployment. Recently developed hands-on projects using Large Language Models, Retrieval-Augmented Generation (RAG), and AI APIs. Looking to transition into an AI Application Developer or Generative AI Developer role.

TECHNICAL SKILLS

Programming:	Python, SQL, JavaScript basics
Backend:	FastAPI, Flask, REST APIs
AI & LLM:	Prompt Engineering, LLM APIs, RAG, Embeddings, Vector Databases, LangChain basics
Databases:	PostgreSQL, MySQL, SQLite
Tools:	Git, GitHub, Docker, Postman, VS Code
Cloud:	AWS basics, Render
Libraries:	Pandas, Pydantic, Requests
Testing:	Pytest, API Testing

PROFESSIONAL EXPERIENCE

Software Developer

TechNova Solutions, Bangalore | July 2023 - Present

- Developed and maintained Python backend services used by internal business applications.
- Built REST APIs using FastAPI for communication between internal systems.
- Integrated third-party APIs for customer and order data processing.
- Developed automation scripts that reduced manual report-generation effort.
- Worked with PostgreSQL to store, query, and process application data.
- Implemented input validation and error handling using Pydantic.
- Created unit and API tests using Pytest and Postman.
- Used Git and GitHub for version control and team collaboration.
- Containerized selected applications using Docker.
- Assisted with application deployment and troubleshooting in test and production environments.

Junior Python Developer

Bluewave Technologies, Chennai | June 2022 - June 2023

- Developed Python scripts for data processing and workflow automation.
- Created Flask-based internal tools for operations teams.
- Worked with MySQL databases and wrote SQL queries for reporting.
- Integrated REST APIs from external services.
- Fixed application bugs and supported testing activities.
- Participated in code reviews and Git-based development workflows.

AI PROJECTS

RAG Document Assistant

- Built a Python application that allows users to upload documents and ask questions about their content.
- Extracted and chunked document text before generating embeddings.
- Stored embeddings in a vector database and retrieved relevant context for user questions.
- Integrated an LLM API to generate answers based on retrieved document content.
- Added source references to improve answer traceability.
- Built the user interface using Streamlit.

Technologies: Python, Streamlit, LLM API, RAG, Embeddings, Vector Database

AI Support Ticket Analyzer

- Built an AI application that converts unstructured customer messages into structured support tickets.
- Used an LLM to extract issue type, priority, sentiment, and required action.
- Implemented structured output validation using Pydantic.
- Added deterministic business rules for priority and human-review decisions.
- Created automated tests using Pytest.

Technologies: Python, Pydantic, LLM API, Pytest, Streamlit

AI Resume & Job Description Analyzer

- Created a prototype that compares a resume against a job description.
- Extracted required skills from job descriptions and compared them with candidate skills.
- Generated suggestions for improving resume relevance.
- Added safeguards to prevent the system from inventing candidate experience.

Technologies: Python, LLM API, Prompt Engineering

EDUCATION

Bachelor of Technology in Computer Science Engineering

Anna University | 2018 - 2022

CERTIFICATIONS

- Python Programming Certification
- AWS Cloud Practitioner Essentials
- Introduction to Generative AI

ADDITIONAL INFORMATION

- Interested in Generative AI, LLM applications, backend development, and AI automation.
- Currently learning advanced RAG, AI agents, and LLM evaluation techniques.
- Open to opportunities in Bangalore, Chennai, or remote roles.
